

The first of these is the  
 fact that the population  
 of the world is increasing  
 at a rapid rate. This is  
 due to a number of factors,  
 including improved medical  
 care, better nutrition, and  
 a longer life span. The  
 result is that there are  
 more people in the world  
 than ever before. This  
 has led to a number of  
 problems, including a  
 shortage of food, a lack  
 of housing, and a need  
 for more resources. It is  
 therefore essential that we  
 find ways to deal with  
 these problems. One way  
 to do this is by improving  
 our agricultural methods.  
 Another way is by using  
 our resources more wisely.  
 Finally, we must find ways  
 to control our population.  
 If we do not, the world  
 will be a much poorer  
 place.
